COUNTRY Germany (Russian Zone) **CONFIDENTIAL** DATE DISTR. 13 APR 1949  
SUBJECT Production and Distribution of NO. OF PAGES 8  
Chemicals  
PLACE ACQUIRED 25X1A CIA LIBRARY *P10* *P30* NO. OF ENCL. 1 (7 pages)  
(LISTED BELOW)  
DATE OF INF [REDACTED]

SUPPLEMENT TO 25X1X  
REPORT NO. [REDACTED]

1. The plans listed below were completed on 28 February 1949 by a section in the Hauptverwaltung Materialversorgung of the DMI, apparently headed by (fnr) Rosenbaum, and were passed on to Erwin Kerber, chief of the Hauptverwaltung. It is not clear whether any part of them has been approved by the SLA. As they stand, they represent the proposed plans for production and import of various items in the chemical and related fields (in addition to stocks on hand at the beginning of the year) for 1949, and for the distribution of the quantities expected to be available. They are tabulated together with the corresponding figures for results actually obtained in 1948.

1948 1949  
(actual) (planned)

Pyrites

Production (publicly owned firms)	68,100 t.	70,000 t.
Imports	133,700	165,000
Stocks as of 1 Jan.	700	22,000
Total supply	202,500	257,000
Distribution:		
Assignment to allocating agencies	180,500	235,000
Stocks as of 31 Dec.	22,000	22,000

Potassium salts

Production	917,200 t.	970,000 t.
SAGs	693,000	720,000
Publicly owned firms	224,200	250,000
Stocks as of 1 Jan.		37,800
Total supply	917,200	1,007,800
Distribution:		
Assignment to allocating agencies	460,100	622,000
Reparations	180,600	
Export	238,700	378,000
Stocks as of 31 Dec.	37,800	7,800

**CONFIDENTIAL**

Stocks as of 31 Dec.	272	250
<u>Nitrogen fertilizers</u>		
Production (SAGs)		165 t.
Distribution:		
Assignment to allocating agencies		165

2. The allocating agencies (Kontingentsträger) compile the estimated requirements in their respective fields or areas, and submit them to the HV Materialversorgung, which then readjusts them in proportion to the expected supply, on the basis of a table of priorities. Soviet agencies are always, and the SAGs are usually allotted the full quantities requested; for other consumers the estimates are frequently reduced. The allocating agencies are the following:

Hauptverwaltung (of the DWK) for Coal  
 " for Energy  
 " for Machine Construction and Electrical Goods  
 " for Metallurgy  
 " for Chemistry  
 " for Light Industry  
 " for the Quarrying Industry  
 " for Agriculture and Forestry  
 " for Transportation  
 " for Communications  
 " for Trade and Supply

Soviet AGs  
 German central organizations and administrations  
 State government of Mecklenburg  
 " " " Brandenburg  
 " " " Saxony  
 " " " Saxony-Anhalt  
 " " " Thuringia  
 City of Berlin (Soviet sector)  
 Economic Division of SKA

CENTRAL INTELLIGENCE AGENCY

- 8 -

Allotments are also made, as indicated in the table above, for reparations, the Soviet Army, export, and a zonal reserve. In some cases the table shows that the final allocations have not yet been made, and in these cases the figure given under "Reserve" is exceptionally high. The Attachment lists the individual allocations, so far as they are given in the document at hand. It is the duty of the agencies involved to make sub-allocations to the actual consumers under their jurisdiction.

4. In the table above, certain inconsequential corrections have been made where, as so often in German statistics, the addition is inaccurate.

25X1A

\* [REDACTED] Comment. No figures given for 1948 because this item was then included under "Solvents". It is assumed that the same is true of Butanol, for which the 1948 figures are also lacking.

~~CONFIDENTIAL~~
